( Pages)

With numerous standard and optional body colours now being used, it becomes necessary to keep a permanent record on file to enable dealer to classify proper colour when it becomes necessary to order replacement parts. To state blue or green is not sufficient, as you will realize by list of standard colours.

A space for colour is provided on SE.60 delivery record card. Body colour shown on invoice copy of new car billing is to be properly recorded for future convenience in ordering replacement parts where colour must be matched.
